Valuation based on retail replacement at a Perth traditional bricks and mortar retail outlet.

Four thousand three hundred and thirty dollars. **$ 4,330.00**

This certificate does not represent the second-hand resale value of the item. Second-hand value depends on market conditions, demand and negotiation, and is determined solely between the owner and a willing buyer. No guarantee is made or implied regarding the amount the item may achieve on the open market.

Terms & Conditions

This certificate of valuation is prepared for insurance replacement purposes only, unless otherwise stated, and represents the estimated retail replacement value at the date of valuation. It is not intended for marketing, advertising or sale purposes, and does not imply any agreement to purchase. Values are subject to change due to fluctuations in precious metal markets, gemstone availability and retail conditions. Reliance on this document is limited to the addressee unless specifically noted, and no responsibility is accepted for any commercial transaction involving it.

Values are expressed in Australian dollars and include GST where applicable. They reflect average retail prices — neither the highest nor the lowest a buyer would expect to pay — based on current metal prices and the AUD/USD exchange rate at the time of valuation.

Valuations of the same item may vary between valuers due to differences in market conditions, opinion, experience and equipment. Such variation does not necessarily constitute error.

Gemstones have not been removed from their settings for assessment. All grades, colours, clarities and weights are estimated within the limitations imposed by the setting and may differ if the stone is removed and re-graded. Coloured stones are assumed to have been enhanced. More precise grading or detection of treatment requires removal of the stone from the setting, at the owner's request and cost.

Given the prevalence of undisclosed laboratory-grown diamonds salted within parcels of natural diamonds in the current local and international market, identification is necessarily limited by the setting, the size of the stones and the equipment available to trade gemmologists. While all due diligence has been exercised in accordance with the NCJV Code of Ethics, advanced gemmological testing using specialised equipment may be required for positive identification, at the owner's expense.

This document is issued in good faith. All valuations are conducted in accordance with National Council of Jewellery Valuers (NCJV) guidelines. Victoria Jeweller & Watchmaker accepts no liability for errors or omissions, including any liability arising by reason of negligence, to any party other than the addressee. Reproduction of this certificate without authorisation is prohibited.
