Feature central white gold four claw setting, housing one oval natural sapphire, claw set. Either side of the central setting, is one three claw setting, each housing one single cut diamond, claw set. The settings are secured to the underrail, and in between the extended and pointed shoulders, of the plain and polished yellow gold band.

Stamped '18ct' - acid tested as 18 carat gold.

Ring size: O.

The ring contains:

- One claw set oval shaped natural sapphire, colour is "blue".
Dimensions = 7.76mm(L) x 6.16mm(W) x 3.81mm(D-estimated)
Total Weight = 1.50ct (estimated - see NOTE below)
- Two bead set single cut diamonds, clarity is "Si", colour is "I".

Total Item Weight = 3.18 grams Total Gemstone Weight = 1.53ct Total Metal Weight = 2.87 grams (estimated)

NOTE: Due to setting constraints, limited testing indicates that the corundum may be beryllium bulk diffusion treated. However, this can only be verified if the stone is removed from the setting and sent to a major laboratory for full chemical analysis which is the only way this type of treatment can be accurately identified. Due to setting constraints, the exact dimensions of the gemstones cannot be ascertained. Therefore, weights of the gemstones are very much estimated. For accurate testing, weights, colour, and clarity gradings, the gemstones require removal from the settings. The below replacement figure is based upon crafting a similar ring employing similar materials and techniques being for a retail insurance purpose only. This figure does not represent the previous selling price of the item and will not be indicative of the resale value of the item.
